-  Photograph by Bill Curtsinger  
Glowing in McMurdo Sound, Antarctica, this transparent jellyfish seems to inhabit another world. From the Arctapodema genus, the transparent jellyfish's grandeur is more remarkable given its inch-long (2.5-centimeter-long) size.
-  Photograph by David Doubile  
The tentacles of a box jellyfish (Chironex fleckeri) trail behind it and can reach 15 feet (4.6 meters) in length. Found in northern Australia and adjacent waters, a sting from this species can be deadly. This species of box jellyfish, the largest, can have as many as 60 tentacles.
